FCC License Application Form—Deere & Company

John Deere and Enterprise Wireless Alliance have teamed up to provide your company with a fast and efficient means of obtaining a Federal Communications Commission license for your new radio system. According to FCC rules, **FCC Rule 1.903(a), Authorization Required, states that a valid FCC license must be obtained to operate your new system.** Complete this form and return it to EWA either by FAX to 703-524-1074; or by email to customerservice@enterprisewireless.org. You will be notified by email of the receipt of your application, the frequency selected and EWA will notify you of the call sign of your new ten year FCC license. If you have any questions, please call EWA at 800-482-8282.

The total cost of your new ten-year FCC license for **one** transmitter location is **\$770**. For each additional transmitter location add \$195 per transmitter to the total cost (maximum of 6). EWA also invites you to become a member of EWA for \$200 a year. Learn more about EWA member benefits at <http://www.enterprisewireless.org/Membership>.

Note: If you have an FCC Registration Number (FRN), provide it below. If not, EWA will register you with the FCC using your Taxpayer Identification Number (TIN).

Licensee Administrative Information

Licensee Name _____ FCC FRN or Taxpayer ID#: _____

Authorized Contact _____

Address _____ City _____ State _____ ZIP Code _____

Phone _____ Email _____

Entity Type: Corp LLC Individual Other

Fees Include

For information regarding EWA and FCC fees to file electronically, please see EWA’s website at

https://www.enterprisewireless.org/resources/schedule_services.

Note: Maximum of 6 base station locations can be applied for on this form

- FCC Registration
- Application Preparation
- Coordination (per site)
- FCC Filing Fee (New 10 yr. license)
- FCC Filing Fee (Modification)
- NT Filing

Base Station System Information

- All radio transmitters will reflect an output power of two watts.
- All locations will reflect the emission designators of 11K2F1D.
- Enter Ground elevation, antenna structure height and antenna height in **meters**. If structure is a tower and registered, please include an ASR number.
- If structure is a tower, what type of tower is it? (LTOWER or GTOWER).
- Enter Latitude/Longitude Coordinates in **decimal format** OR degrees/minutes/seconds.
- Base Stations **with Amplifier** set ERP to **70 Watts**. Base Stations **without amplifiers** set ERP to **20 Watts**.
- Number of rovers/mobile units per site: _____

Base Station One:

Transmitter Location (street address, city, county, state) _____

Coordinates _____ Ground Elevation _____ ERP _____

Antenna Structure Type _____ Antenna Structure Height _____ Antenna Height _____

Base Station Two:

Transmitter Location (street address, city, county, state) _____

Coordinates _____ Ground Elevation _____ ERP _____

Antenna Structure Type _____ Antenna Structure Height _____ Antenna Height _____

Base Station Three:

Transmitter Location (street address, city, county, state) _____

Coordinates _____ Ground Elevation _____ ERP _____

Antenna Structure Type _____ Antenna Structure Height _____ Antenna Height _____

Base Station Four:

Transmitter Location (street address, city, county, state) _____

Coordinates _____ Ground Elevation _____ ERP _____

Antenna Structure Type _____ Antenna Structure Height _____ Antenna Height _____

Base Station Five:

Transmitter Location (street address, city, county, state) _____

Coordinates _____ Ground Elevation _____ ERP _____

Antenna Structure Type _____ Antenna Structure Height _____ Antenna Height _____

Base Station Six:

Transmitter Location (street address, city, county, state) _____

Coordinates _____ Ground Elevation _____ ERP _____

Antenna Structure Type _____ Antenna Structure Height _____ Antenna Height _____
