**Re: Informal Objection
KMRZ-LD Displacement Application
File No. 0000150609**

Dear Ms. Dortch:

Attached please find the Informal Objection of the Enterprise Wireless Alliance ("EWA") to the above-identified displacement application filed by KMRZ-LD. Contrary to the assertion in the application, there are hundreds of land mobile systems in the Los Angeles area operating on channel 20 frequencies. These systems are entitled to protection from low-power television stations such as KMRZ pursuant to FCC Rule Section 74.709(a) and would experience harmful interference from its proposed operation. For this reason, EWA requests that this application be denied.

Sincerely,

ENTERPRISE WIRELESS ALLIANCE

Mark E. Crosby
CEO

To relocate from Channel 26)
To Channel 20)
(Los Angeles, California))

To: Chief, Media Bureau

**INFORMAL OBJECTION
OF THE
ENTERPRISE WIRELESS ALLIANCE**

The Enterprise Wireless Alliance (“EWA”), on behalf of its members and the many other private land mobile radio (“PLMR”) licensees operating on T-Band channel 20 in the Los Angeles market, opposes the application of KMRZ-LD to relocate its operations from channel 26 to channel 20 (“Application”). The Application is based on an almost unfathomable misunderstanding of the use of channel 20 by PLMR entities in the Los Angeles area and must be denied.

KMRZ clearly recognizes that PLMR entities have had primary authority to operate on channel 20 frequencies in Los Angeles for decades. The Engineering Statement accompanying this application specifically notes that “Section 74.709(a) requires LPTV stations to protect land mobile radio services on channel 20 within 130 km of the Los Angeles reference point.” However, inexplicably, it goes on to state that “there are no operating LMRS services on channel 20 within this radius. Therefore, this application is immediately grantable.”

EWA cannot fathom how KMRZ reached that conclusion. The FCC’s Universal Licensing System (“ULS”) database identifies hundreds of PLMR facilities authorized to operate on channel 20 frequencies within 130 km of the Los Angeles reference point as well as a number of pending applications for channel 20 frequencies. The licensees include City of Los Angeles, Los Angeles

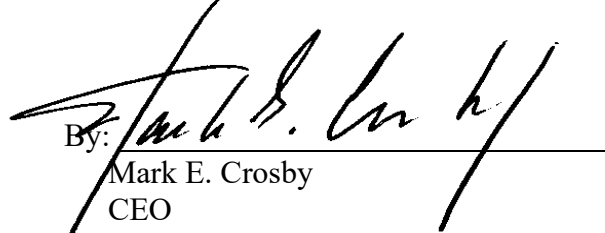

MTA, Port of Los Angeles, Orange County Transportation Authority, South Bay Regional Communications Authority, Los Angeles County DPW, Cities of Claremont, Long Beach, Pasadena, Santa Monica, and Torrance, Northrop Grumman Systems Corporation, and numerous commercial dispatch providers whose customers include critical infrastructure, medical, educational, transportation and other businesses serving the needs of the public in this area. A listing of those facilities is included as Attachment A.

Contrary to its statement, the Application is not immediately or, in EWA's opinion, ever grantable. KMRZ could not fulfill its responsibility "to modify its service to cure any interference" given the number of operational PLMR systems in the area. It certainly would need to "cease operations with its proposed service." Under these circumstances, KMRZ's request to relocate from channel 26 to channel 20 must be denied.

EWA cannot explain how KMRZ failed to notice in ULS the licenses and pending applications listed on Attachment A. But the basis for its error is immaterial. There are operating PLMR systems in the area. Indeed there are hundreds of them being used by governmental and business entities in support of their day-to-day activities. A channel 20 KMRZ could not provide the protection to which they are entitled under the FCC rules. The instant application must be denied.

Respectfully submitted,

ENTERPRISE WIRELESS ALLIANCE
